SUMMARY

Seeking to leverage and utilize my software development skill to create dynamic and fully responsive web applications, increase efficiency by facilitating user-experience and minimizing development cost. Driven to learn and work hard to exhibit a solid understanding in the **software development** industry. As of March 26, I will be available for full-time employment.

ACTIVITIES

Snap it! Iphone Case | Full-stack E-commerce Shop

Link: <https://snap-it.vercel.app/>

- Developed fully responsive and dynamic UI with React components and styled with Tailwind CSS
- Created api end-points for CRUD operation and managed MongoDB database with Mongoose
- Integrated Paypal, Redux for state management and JWT for admin authentication

Story | Full-stack MERN App

Link: <https://story-fe.onrender.com/>

- Developed frontend with React, React Query, React Router and styled with SASS
- Created REST API using Node and Express with MongoDB.
- Integrated Stripe for payment, JWT for authentication and Bcrypt for password hashing
